AZURE CLOUD TRAINEESHIP

Start your Azure Cloud career

A structured roadmap that starts with IT support training and placement, then continues with cloud programs assigned to help you grow your Azure and cloud career.

5 STEPS | 2-MONTH CORE PROGRAMME | EXAM VOUCHER INCLUDED | PLACEMENT SUPPORT + CLOUD CAREER PROGRAMS

ONLINE · HANDS-ON · CAREER-FOCUSED

Online upskilling — Step 1 — 01

LiveLabs — Step 2 — 02

Certification — Step 3 — 03

Placement support — Step 4 — 04

Cloud career programs — After placement — 05

THE PATHWAY

From IT training to the cloud

A two-phase pathway: enter the IT industry first, then grow your Azure and cloud skills.

1. **IT Training** — Build your IT foundation
2. **IT Support Job** — Secure your first role
3. **Cloud Career Training** — Programs assigned to you
4. **Career Progression** — Azure cloud career

PHASE 1 / IT CAREER ENTRY

Enter the IT industry

You complete the accredited IT foundation training, build your technical profile and receive placement support to help you secure your first IT support role.

- CompTIA A+, Windows, Endpoint, Microsoft 365 and Azure Fundamentals
- Live labs, live projects and mentor assessments
- CV, interview and job search support
- Role: IT support, with an expected salary of £25k–£35k

PHASE 2 / CLOUD CAREER ACCELERATION

Grow your salary with cloud skills

After you are placed, the Career Galaxee team guides you and assigns the program that takes you toward your career goals, helping you grow your salary after your first role.

- Microsoft Azure Administrator (AZ-104)
- CompTIA Cloud Essentials+
- Google Cloud Platform (GCP)
- Subject to programme requirements and terms

THE ROADMAP

Your five-step traineeship roadmap

From online upskilling to assigned cloud career programs.

STEP 1

01

Online upskilling
+ dedicated support

Accredited CompTIA and Microsoft courses, taught with live mentors who have industry experience.

- Flexible times and support
- Technical foundations
- Hands-on projects

STEP 2

02

LiveLabs
+ hands-on practice

Go beyond theory: apply your knowledge in practical environments and real project scenarios.

- Practical environment
- Hands-on technical skills
- Real projects, real scenarios

STEP 3

03

Certification recognition

Mentor-led practical assessments and exam preparation to seal your expertise.

- Practical assessments
- Troubleshooting support
- Exam pre-preparation

STEP 4

04

Placement support

CV revamp, interview preparation, mock interviews and a personal job search strategy.

- Professional CV revamp
- Unlimited mock interviews
- Personal marketing strategy

AFTER PLACEMENT

05

Cloud career programs

Assigned after placement: Azure Administrator (AZ-104), Cloud Essentials+ and Google Cloud.

- Azure Administrator (AZ-104)
- CompTIA Cloud Essentials+
- Google Cloud Platform (GCP)

IT TRAINING › IT SUPPORT JOB › CLOUD CAREER TRAINING › CAREER PROGRESSION

STEPS 1 AND 2

Learn, then practise

Online upskilling with mentors, then LiveLabs and real project scenarios.

STEP 01 / ONLINE

Online upskilling

01

+ dedicated support

1. **Accredited CompTIA and Microsoft courses**
2. **Live mentors with industry experience**
3. **Flexible times and support**
4. **Hands-on projects for practical experience**

Complete accredited IT courses from CompTIA and Microsoft, upskilling through live mentors with industry experience. Learn at times that suit you and build your technical foundations.

STEP 02 / LIVELABS

LiveLabs

02

+ hands-on practice

1. **Work in a practical environment**
2. **Develop hands-on technical skills**
3. **Apply learning to real projects**
4. **Realistic scenarios, not just theory**

Take your learning beyond theory with practical activities designed to help you apply your knowledge in realistic situations, working on real projects in real scenarios.

STEP 3 + LIVE PROJECTS

Prove your skills

Certification recognition, and live projects you can show to employers.

STEP 03 / CERTIFICATION

Certification recognition

03

Test, improve, qualify

1. **Practical assessments via mentors**
2. **Skills and troubleshooting support**
3. **Pre-preparation for exam qualification**
4. **Exam voucher included**

We help you test your knowledge, then assign you to a dedicated mentor to seal your expertise, with support to improve your skills and prepare for your exams.

LIVE PROJECTS

Real experience to showcase

Build a stronger CV and stand out to employers

1. **New Hire Machine Onboarding**
   Set up laptops with accounts, Microsoft 365 and security policies.
2. **Employee Onboarding Ticket**
   Manage onboarding end to end, from HR request to final handover.
3. **Leaver / Offboarding Management**
   Disable access, recover equipment and protect organisational data.
4. **Device Compliance Remediation**
   Fix encryption, antivirus, update and policy issues on endpoints.
5. **Application Troubleshooting**
   Diagnose crashing apps using logs, permissions and configuration.

STEP 1 / COURSES INCLUDED

IT support foundations

Recognised CompTIA and Microsoft training that opens the door to your first role.

220-1201 + 220-1202

CompTIA A+

- Mobile devices, networking, hardware, virtualisation and cloud basics
- Operating systems, software issue resolution and IT procedures
- Security-aware IT support and structured fault-finding

MD-100

Microsoft Windows Client

- Windows installation, configuration, deployment and device management
- User accounts, applications, connectivity and troubleshooting
- Security, system maintenance and support procedures

MD-102

Microsoft Endpoint Administrator

- Windows deployment, configuration and device lifecycle management
- Microsoft Intune, application management and endpoint administration
- Device security and compliance policies

MS-102

Microsoft 365 Administrator

- Tenant management, user identities, roles and settings
- Exchange Online, Teams, SharePoint and OneDrive
- Security, compliance and identity protection

AZ-900

Azure Fundamentals

- Cloud concepts, Azure architecture and computing services
- Networking, storage, administration and Azure solutions
- Pricing structures, SLAs and exam preparation topics

STEP 4

Ultimate career support for placement

A guided process, with clear actions at each stage, from upskilling into your first IT support role.

01

Profile branding

CV

We revamp and tailor your CV to highlight your technical skills, certifications, experience and transferable strengths, matching what employers want in junior IT roles.

02

Interview preparation

HR + TECHNICAL

Coaching for HR and technical interviews separately, with preparation at each upskilling step rather than waiting until the end.

03

Job search strategy

DEDICATED MENTOR

A dedicated placement support mentor designs an individual strategy to market you to the right companies and opportunities.

04

Placement and role progression

NEXT STEP

After you are placed, the team guides you and assigns the program that takes you toward your career goals and a higher salary path.

WHAT MAKES THIS DIFFERENT

1. **Live projects, real experience**
2. **Profile branding, employer visibility**
3. **Mock interviews, interview confidence**
4. **Job or money back process (see terms)**

STEP 5 / NEW / AFTER PLACEMENT

Cloud career programs, assigned to you

Career acceleration: grow your salary after getting your first role.

1 Azure Administrator

01

AZ-104 / ADMINISTRATION

Manage and maintain cloud environments with Microsoft Azure, configuring, monitoring and maintaining resources securely.

- Identities, governance, subscriptions, resources and storage
- Virtual machines, networking, containers and compute
- Monitoring, backup, security and administration procedures

2 Cloud Essentials+

02

COMPTIA / CLOUD FOUNDATIONS

Understand cloud concepts, technologies and the business factors involved when organisations adopt cloud services.

- Cloud concepts, service and deployment models
- Security, risk management, governance and compliance
- Operations, cost management and performance

3 Google Cloud Platform

03

GCP / MULTI-CLOUD SKILLS

Work with core Google Cloud services used to build, deploy and manage applications and infrastructure.

- Compute, storage, networking and database services
- Infrastructure, resource management, IAM and security
- Application deployment, monitoring and scalability

SKILLS YOU DEVELOP

Azure administration | Virtual machines and networking | Cloud security and governance | Cost management | Google Cloud services

Specific training and certification requirements may vary according to the programme pathway and applicable terms.

THE PROGRAMME

What is included

Everything you need to build your IT knowledge and prepare for your next career step.
