

CYBER SECURITY ENGINEER TRAINEESHIP

# Become a Cyber Security Engineer

A structured roadmap that starts with IT support training and placement, then continues with cyber security programs assigned to take you toward a cyber security engineer career.

5 STEPS

2-MONTH CORE PROGRAMME

EXAM VOUCHER INCLUDED

PLACEMENT SUPPORT + CYBER SECURITY PROGRAMS

ONLINE · HANDS-ON · CAREER-FOCUSED

Online upskilling

Step 1

01

LiveLabs

Step 2

02

Certification

Step 3

03

Placement support

Step 4

04

Cyber security programs

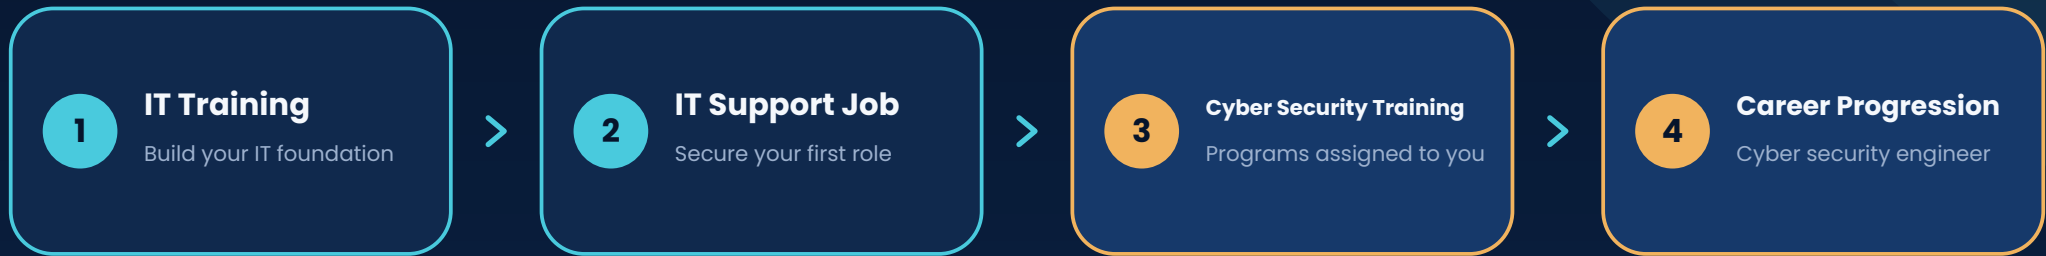

After placement

05

# From IT training to cyber security

A two-phase pathway: enter the IT industry first, then specialise in cyber security.

## PHASE 1 / IT SUPPORT CAREER ENTRY

### Enter the IT industry

You complete the required IT foundation training, build your technical profile and receive career and recruitment support to help you work towards securing an IT support role.

- CompTIA A+, Windows, Endpoint and Microsoft 365 training
- Live labs, live projects and mentor assessments
- CV, interview and job search support
- Role: IT support, with an expected salary of £25k–£35k

## PHASE 2 / CYBER SECURITY CAREER DEVELOPMENT

### Specialise in cyber security

After you secure your IT support role, Career Galaxee assigns your cyber security training, so you can build specialist security knowledge while progressing in your IT career.

- CompTIA CySA+ and Ethical Hacking
- CompTIA PenTest+ and Digital Forensics (CHFI)
- Threat detection, vulnerability assessment and incident response
- Subject to programme requirements and terms

# Your five-step traineeship roadmap

From online upskilling to assigned cyber security programs.

IT TRAINING > IT SUPPORT JOB > CYBER SECURITY TRAINING > CAREER PROGRESSION

# Learn, then practise

Online upskilling with mentors, then LiveLabs and real project scenarios.

## STEP 01 / ONLINE

### Online upskilling

+ dedicated support

01

1

**Accredited  
CompTIA and  
Microsoft courses**

2

**Live mentors with  
industry  
experience**

3

**Flexible times and  
support**

4

**Hands-on  
projects for  
practical  
experience**

Complete accredited IT courses from CompTIA and Microsoft, upskilling through live mentors with industry experience. Learn at times that suit you and build your technical foundations.

## STEP 02 / LIVELABS

### LiveLabs

+ hands-on practice

02

1

**Work in a  
practical  
environment**

2

**Develop  
hands-on  
technical skills**

3

**Apply learning to  
real projects**

4

**Realistic  
scenarios, not just  
theory**

Take your learning beyond theory with practical activities designed to help you apply your knowledge in realistic situations, working on real projects in real scenarios.

# Prove your skills

Certification recognition, and live projects you can show to employers.

## STEP 03 / CERTIFICATION

### Certification recognition

03

Test, improve, qualify

**1** Practical assessments via mentors

**2** Skills and troubleshooting support

**3** Pre-preparation for exam qualification

**4** Exam voucher included

We help you test your knowledge, then assign you to a dedicated mentor to seal your expertise, with support to improve your skills and prepare for your exams.

## LIVE PROJECTS

### Real experience to showcase

Build a stronger CV and stand out to employers

**1** **New Hire Machine Onboarding**  
Set up laptops with accounts, Microsoft 365 and security policies.

**2** **Employee Onboarding Ticket**  
Manage onboarding end to end, from HR request to final handover.

**3** **Leaver / Offboarding Management**  
Disable access, recover equipment and protect organisational data.

**4** **Device Compliance Remediation**  
Fix encryption, antivirus, update and policy issues on endpoints.

**5** **Application Troubleshooting**  
Diagnose crashing apps using logs, permissions and configuration.

# IT support foundations

Recognised CompTIA and Microsoft training that opens the door to your first role.

220-1201 + 220-1202

## CompTIA A+

- Mobile devices, networking, hardware, virtualisation and cloud basics
- Operating systems, software issue resolution and IT procedures
- Security-aware IT support and structured fault-finding

MD-100

## Microsoft Windows Client

- Windows installation, configuration, deployment and device management
- User accounts, applications, connectivity and troubleshooting
- Security, system maintenance and Windows support procedures

MD-102

## Microsoft Endpoint Administrator

- Windows deployment, configuration and device lifecycle management
- Microsoft Intune, application management and endpoint administration
- Device security and compliance policies

MS-102

## Microsoft 365 Administrator

- Tenant management, user identities, roles and settings
- Exchange Online, Teams, SharePoint and OneDrive
- Security, compliance and identity protection

### ALSO CAN INCLUDE

CompTIA Network+ · Azure Fundamentals · Networking fundamentals · IT troubleshooting · Endpoint and device management

## STEP 4

# Ultimate career support for placement

A guided process, with clear actions at each stage, from upskilling into your first IT support role.

1

01

## Profile branding

CV

We revamp and tailor your CV to highlight your technical skills, certifications, experience and transferable strengths, matching what employers want in junior IT roles.

2

02

## Interview preparation

HR + TECHNICAL

Coaching for HR and technical interviews separately, with preparation at each upskilling step rather than waiting until the end.

3

03

## Job search strategy

DEDICATED MENTOR

A dedicated placement support mentor designs an individual strategy to market you to the right companies and opportunities.

4

04

## Placement and role progression

NEXT STEP

After you are placed, the team guides you and assigns the program that takes you toward your career goals and a higher salary path.

### WHAT MAKES THIS DIFFERENT

1

Live projects, real experience

2

Profile branding, employer visibility

3

Mock interviews, interview confidence

4

Job or money back process (see terms)

# Cyber security programs, assigned to you

Once you secure your IT support role, Career Galaxee assigns your advanced cyber security training.

## 1 **CompTIA CySA+**
